

# BOOKS THAT COUNT

## Infant Toddler

WED. APRIL 10  
5:45 PM -7:45 PM

Community Learning  
Center @ the Library  
305 S Michigan St,  
South Bend, IN 46601  
Training room C

**Food will be provided**

*Caregivers play a special role in early cognitive development. As children explore and investigate, they are forming the foundations of mathematical thinking. While infants and toddlers instinctively notice the math all around them, caregivers have the task of supporting their understanding through experiences and language.*

In this training, we will investigate the areas of mathematical cognitive development and their association with the KDIs, strategies to expand mathematical development and intentional language that support mathematical thinking.

As a thank you for your participation everyone will receive a free book to take back to the classroom.
