

# PRESCHOOL 2023-24 TRAINING SERIES

## The Math Lab

Session 1: Thursday Dec. 14, 2023 12:30-2:00 p.m.  
Topic: The 5 components of math and how they relate to the KDIs

Session 2: Thursday Feb. 15, 2024 12:30-2:00 p.m.  
Topic: Scaffolding throughout the daily routine

Session 3: Thursday Apr. 18, 2024 12:30-2:00 p.m.  
Topic: Books and materials that support mathematical learning

Math Lab: Empowering preschool teachers through mathematical professional development.

The math lab was created for newer teachers who have had 1-2 years in the classroom and is currently implementing the HighScope curriculum. The emphasis will be based on intentional planning with playful hands-on experiences.

Our focus will be:

- The 5 components of math and how they relate to the KDIs
- Scaffolding throughout the daily routine
- Books and materials that support mathematical learning

Homework and observations are required but don't fret...free materials will be given for each of the 3 observations in your classroom.

We hope you will join us to challenge and stretch your knowledge on your way to becoming the best teacher you can be!

**Lunch will be served.**
